

Blackpool Victoria Hospital

REQUIREMENT:

The surgery was constructing a new access point; however, an irregularity in the concrete levels would hinder wheeled hospital beds from using the walkway.

With its reusable components, a modular ramp was selected as a cost-effective solution to bridge the gap.

CAD DRAWINGS:

Our in-house design team created the CAD drawings.

These were provided to the client with their quotation.

APPLICATION

Healthcare

LOCATION

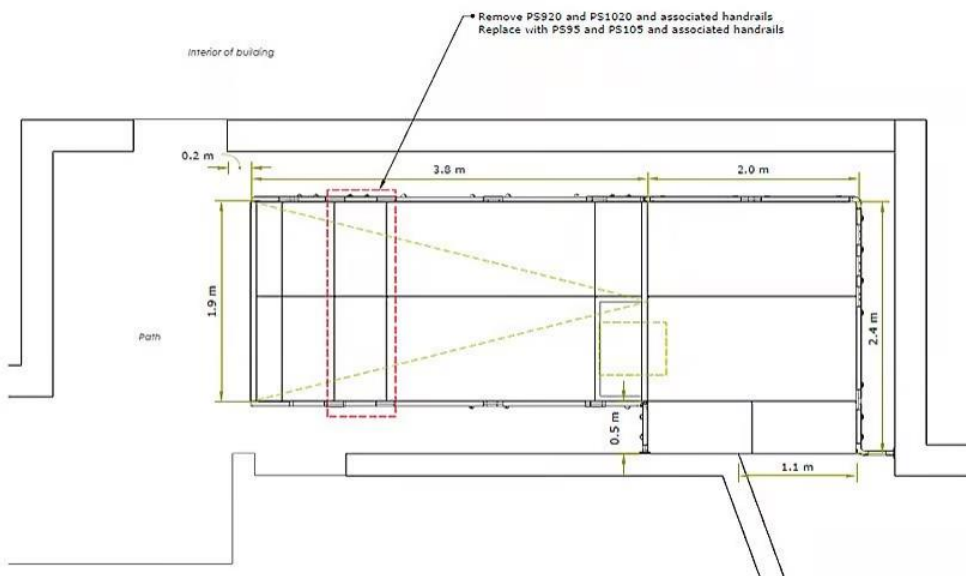

Blackpool

SYSTEM

Fully Compliant Modular Ramp

SERVICE PACKAGE

Supply & Install

END RESULT:

A fully compliant ramp with a 1:15 gradient, was efficiently installed within a few hours. This swift installation enabled the new entrance to open promptly.

The ramp features an access hatch, facilitating entry to the drain underneath.

FEATURES INCLUDED:

- Infill Handrail - This product safeguards against users climbing or falling through gaps.
- Yellow Tread - A safety feature designed to help those with impaired vision identify the system's nose and any level changes.
- Trombone Ends - Installed at the ends of a Rapid Ramp to prevent clothes from snagging.
- Mesh Platform - Self-draining mesh allows water to pass through, preventing surface accumulation.
- Continuous Handrail - This handrail system ensures that users always have a support to hold onto.
- Standard Colour: Black - Our ramps boast a powder-coated black finish, ensuring durability beyond typical paint.
- Adjustable Telescopic Legs - These can be adapted to suit various threshold heights.

EXTRA FEATURE INCLUDED:

- Access Hatch - The hatch opens, granting individuals access to the underground services.
