

CASE STUDY: King George Hospital

PROJECT BACKGROUND:

The development of a stand-alone CT Scanning facility, separate from the main hospital.

The facility needed to be relocation to reflect any future site changes, or if it becomes part of longer-term plan for a Community Diagnostic Centre.

The new solution included a new Examination Room for a CT Scanner, Control Room, Canulation Area & Changing Room.

Application: Healthcare

.....

Location: Barking, London

.....

System: The Fully Compliant Modular Ramp

.....

Service Package: Supply & Installation

.....

REQUIREMENT:

The main contractor requested a modular Rapid Ramp to provide access to the building within a quick turnaround time.

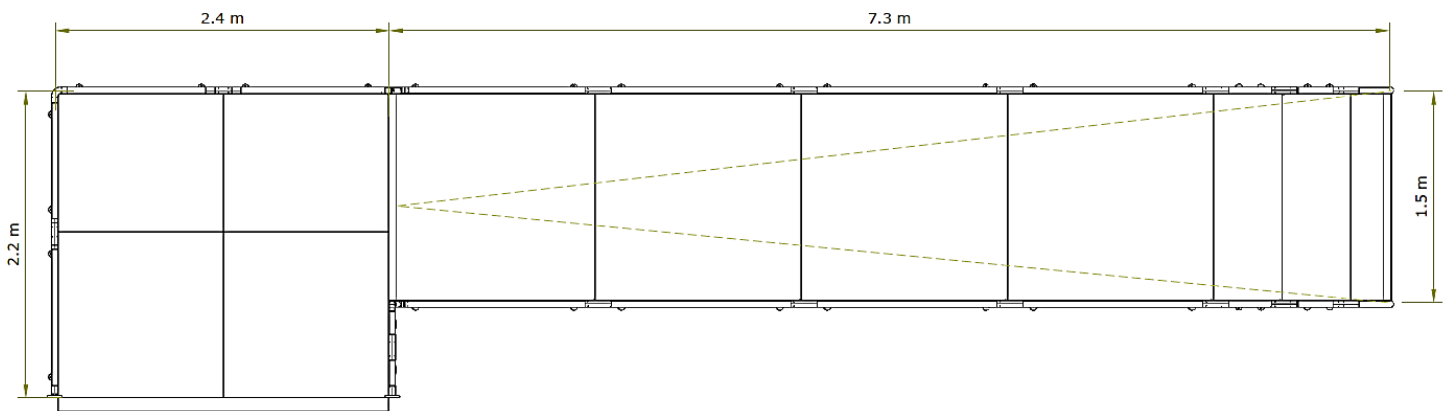

Like the facility itself, Rapid Ramp products are completely reusable and relocatable, thus making them ideal to adapt to potential future site alterations.

CAD DRAWINGS:

CAD drawings were produced in-house based on project technical drawings supplied by the client.

PLAN

END RESULT: The ramp was designed, manufactured, and installed by the Rapid Ramp team.

The wide platforms cover the dimensions of the double doors that open outwards.

FEATURES INCLUDED:

- Infill Handrail - this product prevents users from climbing or falling through gaps.
- Yellow Tread - this is a safety feature designed to help those with impaired vision identify the nose of the ramp and any level changes.
- Trombone Ends - these are added to the ends of a Rapid Ramp to prevent clothes catching.
- Mesh Platform - the self-draining mesh allows water to pass through rather than collect on the surface.
- Continuous Handrail - this handrail system ensures users always have support to hold onto.
- Standard colour: Black - Ramps are powder coated black to create a durable finish that is tougher than conventional paint.
