

Mobile Cataract Suite

REQUIREMENT:

The design, supply, and installation of a modular ramp to the new mobile cataract suite located on the grounds of the Hospital.

The suite is playing a crucial role in helping the trust efficiently address the COVID-19 backlogs that inevitably accumulated during the pandemic, while also effectively reducing waiting times for Eye Care (Ophthalmology).

The mobile suite was a custom-built modular trailer constructed off-site and transported into position.

Both the trailer and the Rapid Ramp System feature a flexible modular design, and if required, both can be relocated to suit any site changes. In contrast, a concrete or wooden ramp, being a single-use system, lack the same degree of adaptability.

APPLICATION

Healthcare

LOCATION

England, UK

SYSTEM

Fully Compliant Modular Ramp

SERVICE PACKAGE

Supply & Installation

END RESULT:

Our internal teams successfully designed, supplied, and installed a Rapid Ramp that adhered fully to Parts M and K of the Building Regulations.

The installation was finished within a four-day timeframe

FEATURES INCLUDED:

- Looped Trombone Ends – Prevents clothes from snagging at the ends.
- Slip-Resistant Mesh Platform - A multi-directional walkway with self-draining steel mesh and a galvanised finish.
- Anti-climbing Infill Handrail - Prevents users from climbing or falling through gaps.
- Continuous Handrail - Provides unbroken support for users to hold onto.
- Standard Colour: Black - Powder-coated black finish for greater durability than traditional paint.
- Adjustable Telescopic Legs - Adaptable to various threshold heights.
- Slip-Resistant Yellow Tread - Enhances safety by making step edges and level changes more visible to those with impaired vision.
- Rest Platform - A rest platform is required at a height of 5 metres to provide users with a place to pause.
- The 1100mm High Handrails - The system is designed to attach to any level sections, offering additional safety and support.

EXTRA FEATURE INCLUDED:

- Solid Hoarding - Purposefully designed mesh deters unauthorised access to the ramp's underside, making it a popular choice for schools and other public buildings.
