

Nottingham Forest FC

PROJECT BACKGROUND & REQUIREMENT:

Wheelchair access was urgently required to a new hospitality building set to open alongside the start of the Premier League season.

Our modular system was the ideal solution, as it could be installed quickly—typically within 24 hours—even in adverse weather conditions. In comparison, A permanent concrete or timber ramp were deemed unsuitable. A concrete ramp needs several days to cure and is vulnerable to delays in bad weather, while a timber ramp requires custom fabrication and can take up to a week to fit—making both options unable to meet the project's tight deadline.

Supply & Installation

DESIGN PHASE:

Our in-house design team produced a detailed 3D model and 2D plan of the project. These were included with customer's quotation.

INSTALLATION:

The installation was completed on schedule, within just a few hours, by our experienced in-house fitting team.

FEATURES INCLUDED:

- Looped Trombone Ends – Prevents clothes from snagging at the ends.
- Slip-Resistant Mesh Platform - A multi-directional walkway with self-draining steel mesh and a galvanised finish.
- Standard Colour: Black - Powder-coated black finish for greater durability than traditional paint.
- Adjustable Telescopic Legs - Adaptable to various threshold heights.
- Anti-climbing Infill Handrail - Prevents users from climbing or falling through gaps.
- Slip-Resistant Yellow Tread - Enhances safety by making step edges and level changes more visible to those with impaired vision.
- Solid Hoarding - Purposefully designed mesh deters unauthorised access to the ramp's underside, making it a popular choice for public buildings such as schools.
